Continuation Sheet (PTO-303)

Application No.

Continuation of 11. does NOT place the application in condition for allowance because:

With respect to the objections to the specification and claim 24, the amendements will make the claims consistent with the examiner's interpretation previously made in the Final Office Action.

With respect to the rejection under 35 USC 112 first and second paragraphs, because the terms "multiple ones of the plurality of data sources" and "various data sources" have the same meaning as stated in the applicant's remarks, therefore the amendments will make the claims consistent with the examiner's interpretation previously made in the Final Office Action.

With respect to the art rejection, applicant argues the Melchione disclosure is inconsistent with the claimed subject matter or a uniform, central access to the data sources. However, the examiner maintains the rejection.

Applicant argues the "Melchione discloses a system 'configured to provide access to data from a plurality of data devices...' Clearly this is what Melchione discloses and clearly this is not what the applicant claims." However, lines 2-3 of claim 9 recites "[A system]...configured to provide access to data from a plurality of data devices" and therefore Melchione reference does teach what is in the claim (Figure 1, column 10 lines 53-56) as is also confirmed by the applicant's representative. Furthermore, as previously cited in the Final Office Action, the Melchione does teach a uniform, central access to the data sources (column 10 lines 34-39 "standardizing incoming fintormation" and column 5 lines 51-60 "stardardizing and householding information from internal and external sources into a centralized database" and "provide a system for...retrieving information from a centralized database").
